EXPERIENCE

NJI Media, Alexandria VA — Web Developer

DEC 2017 - PRESENT

Full Stack web development for client websites built on WordPress and Drupal 7 and 8. Writing clear and modular code for new sites and features; integrating various third-party platforms via plugins and APIs; and using tools such as Git, Pantheon, Gulp/Grunt, SASS/SCSS and visual regression testing.

Major Roles:

Custom theming for WordPress, Drupal 8 sites.

Apply security updates, testing and deployment.

Maintain projects built on Vue.js and Angular.js

Alexys Corp, Reston, VA — QA Analyst

SEPT 2016 - JUL 2017

Performed manual testing and ensured client expectations are met with high quality software solutions.

Project: Doctor On Screen

A web application which allows you to consult your doctor from anywhere in the world.

Major Roles:

Developed test cases to manually test the android and iOS versions.

Performed backend testing and demonstrates proficiency in using SQL query tools.

SunTec, India — Implementation Engineer

FEB 2008 - JUN 2009

Major Roles:

Responsible for the product configuration and user acceptance testing.

Involved in initial automation of modules and successfully generated test scripts and completed automation using Rational Robot.
